DESIGN POWER

by pininfarina

Pininfarina Extra, is part of the world-famous design house Pininfarina, whose history traces back to 1930 when the company was established by Battista Pinin-Farina, who became the most acclaimed car designer of his time For example the Cisitalia 202 by Pininfarina (1947), was the first and only car to enter into a permanent display at the MoMA of New York, in 1961. Up to today, more than 100 Ferrari cars that have gone into production have been designed by Pininfarina.

Today the company has ventured into a variety of commodity sectors where products bearing the Pininfarina name have won acclaim in the world's leading markets. The company attempts to blend the most advanced features of scientific, technological and engineering research with attractiveness that should accompany the things we use every day.

Pininfarina Extra is a reliable and competent partner to firms wishing to use design as a strategic asset for their product development process and a tool of communication to improve their position in the market.

CLAUDIO BELLINI Studio is a Milan based multidisciplinary design studio founded by Claudio Bellini is built on an openminded and innovative perspective, respectful to design heritage, specialized in product, furniture, and interior design since 1996. Integrating different disciplines gives the studio the privilege to provide longterm consultancy to clients by advising on graphic design, architecture, CMF, and brand identity.

Studio's capability of analyzing the complex dynamics of foreign markets has led **CLAUDIO BELLINI Studio** to be recognized all around the world as one of the most influential European design practices.

Today, the studio continues evolving by enhancing the creativity with the support of a talented multinational team through their complementary skills.

LEVIA

Inspired by the combination of lightness, sculptural and dynamism, in the LEVIA collection - light in Latin - the designers were guided by the desire to convey the concepts of strength and softness. The presence of hard, sculpted surfaces and soft materials gives a pleasant perception of solidity and lightness at the same time. The Levía collection brings us a feeling of softness, versatility and design.

360° rotation system with concrete basis under patent.

Continuous up down lifting system of the crank(Patented) for any height up to 2.5m

WING

Inspired by the lightness of wing, the archetype par excellence that combines lightness and strength in the WING collection, the designers were guided by the concept of physical and perceived lightness.

The dynamic, pure and elegant lines give the collection a style suitable for both urban contexts and environments where nature is the protagonist. The elements of the collection are characterized by a folded aluminum structure and enriched by geometric and essential lines that recall the world of architecture.

TEKNO R

The TEKNO R collection takes inspiration from the sails of a white boat in the blue Aegean sea. The energy of the Evil Eye will serenely conduct the sailor to the dry land and nothing can be impossible. With a strong sail, the sailors will find the way home safely. Due to its unique design, it has been awarded the 2024 Red Dot Design Award.
